

# KBS

## Rollobend® System

# SERMAX

For precise and reproduceable bends on electro-polished stainless steel tubing. Large-bend radiuses are ideal for preventing smooth inside walls from crinkling and flaking particles. Each tool bends one tubing size up to 180°. The open side slips over the tube at any point. You get smooth long bends with no marking, scraping or flattening. No need to figure sprint-back - it's been done for you.

### Sizes Available

| Part# | Size: 1/4" tube OD | Part# | Size: 3/8" tube OD  | Part# | Size: 1/2" tube OD |
|-------|--------------------|-------|---------------------|-------|--------------------|
| 4500  | 5x radius, 1.25"   | 6500  | 5x radius, 1.87"    | 8400  | 4x radius, 2.00"   |
| 4800  | 8x radius, 2.00"   | 6600  | 6.67x radius, 2.50" | 8500  | 5x radius, 2.50"   |
| 4100  | 10x radius, 2.50"  | 6800  | 8x radius, 3.00"    | 8600  | 6x radius, 3.00"   |
| 4120  | 12x radius, 3.00"  | 6100  | 10x radius, 3.75"   | 8800  | 8x radius, 4.00"   |
|       |                    |       |                     | 8100  | 10x radius, 5.00"  |

**KBS Rollobend® System Long-Radius Roller-Bearing Tubing Bender** can bend stainless steel, steel, brass, aluminium, soft and some hard copper, and other tubing materials. Large-bend radiuses are ideal for preventing smooth inside walls from crinkling and flaking particles. Each tool bends one tubing size up to 180°. The open side slips over the tube at any point. You get smooth long bends with no marking scraping or faltering.
